Dear Gentlemen,

It has come to my attention that it would be an opportune time to install pressurized fire hydrants along Rice's Crossing Road. I am in favor of a feasibility cost study and efforts to support efforts made by our amazing fire department to safeguard our homes.

Thank you,
Karen Harvey
13146 Rice's Crossing Rd.

To the Fire District Board Members:

We would like to see the proposal for pressurized fire hydrants along Rice's Crossing Road go forward and are in favor of a feasibility cost study.

We would like to see increased resources for fire protection here locally to support our incredible fire department that we are so lucky to have serving the community.

We live at 9255 Rices Texas Hill Road, Oregon House CA. The corner of Rices Texas Hill Road and Rices Crossing. The literal corner is owned by the school district. They do nothing to reduce fire. We have been handling as a good neighbor but may not be able to continue based upon resources.

Our fire insurance now exceeds our mortgage. Any relief to that would be important. Additionally, I have talked to others and they are losing coverage and also having increased rates. So this is a systemic difficulty, land and home owners in Oregon House deal bear. I would assume the system would benefit any folks in Oregon House provider a water resource to the area.

If you have any questions feel free to reach out to us.

Warm regards

Ken Frank

Dear Fire District Clerk of the Board,

We understand there is a possibility of getting pressurized fire hydrants on Rices Crossing Rd. using the Water District's tank. My husband and I would be strongly in favor of this because it would go a long way to increasing the fire fighters' ability to fight fires in our area.

Thank you,

E. Healy and B. Roman

Pressurized Fire Hydrants in Oregon House

Subject: Pressurized Fire Hydrants in Oregon House

From: Conrad Cecil <conradrcecil@gmail.com>

Date: 7/6/24, 3:12 PM

To: peter@pillsburys.com

To the Fire District Clerk of the Board,

As a resident of Rices Texas Hill Road in Oregon House, Yuba County, I would like to see pressurized fire hydrants installed on this road, and Rices Crossing Road, as protection for our homes.

Please move forward with the feasibility study. At this time of high heat and dryness, all measures to increase fire safety are essential parts of an overall plan.

With thanks and regards,

Conrad Cecil
