If you believe Butler did not sign the April 12 letter, then you have to conclude the Richards fabricated the letter. This did not happen; Bulter drafted and signed the letter. A Chief who cannot be honest is a liability to the Fire District.

Greg Holman wants Butler not to say anything about Rices Crossing Road, which might interfere with Fellowship events. This is a conflict of interest that could put people at risk of being hurt or worse in a fire

The board has been compromised to support one person's agenda, an agenda that could put people at risk. Putting people at risk is not the mission of a fire protection district.

Unelected board appointees answer to themselves and can ignore accountability to the voters and the taxpayers.

I was told that you resigned. Can you please send me a copy of your signed resignation from the board?
